EthAI Tour: Kick-off Meeting

The EthAI Tour project – implemented by a European Consortium from Greece, Spain, Malta, Romania and Italy – embarked on its journey with a dynamic Kick-off meeting in Thessaloniki, Greece, in December 2023, hosted by the coordinator Atlantis Engineering. During this initial gathering, partners were presented with the project details and deliverables, setting the stage for collaborative success. The meeting meticulously outlined the project's time plan and delineated responsibilities, ensuring clarity towards achieving shared objectives.

EthAI Tour is an Erasmus+ project that pioneers the ethical considerations surrounding AI in tourism's digital evolution. The project aims to raise VET centres' knowledge and competence in navigating AI's ethical complexities. By employing a methodology rooted in Total Quality Management and Lean principles, EthAI Tour prepares professionals and educators to provide adaptable, high-quality training aligned with industry shifts, ensuring a resilient workforce for the future of tourism. The main outcomes of the project are the following:

- WP1: Project management, quality assurance and evaluation
- WP2: Methodological Framework
- WP3: ECVET profile and Training Plan
- WP4: Training course
- WP5: Dissemination, Exploitation & Sustainability

What's next? The consortium is working on...

WP2/A2 - Analysis of key Methodologies: Internal assessment will evaluate lean and agile approaches, alongside quality assurance methodologies, to inform the creation of the most suited framework to serve the project needs.

WP2/A3 - Methodological Framework: Analysis of existing practices and skills gaps will guide the development of a comparative analysis on assessment methodologies, culminating in a guideline linking AI aspects with responsible digital technology use.

WP2/A4 - Ontology schema development: Building on the Lean Methodological Framework, a lightweight ontology schema will be crafted to structure training content, associating knowledge portions with semantic entities for personalized learning paths.

Get involved

Stay tuned for our upcoming Multiplier Event, where we'll present an overview of our methodological framework and delve into the details of our ontology schema. Get ready to provide valuable feedback on the applicability and appropriateness of these essential project outcomes.
